

LOUNGE: BRITANY SIMON

I believe every house should (if possible) have a room to escape in. I wanted to create a sexy and moody lounge space where you could entertain your friends, sneak away for a drink, or a place to date your spouse from home. It's graphic, and sophisticated with just the right amount of edginess, which is how I love to design.

It's always fun to have the ability to design with only our imagination in mind, versus being a reflection of a client. Personally, I like to push the limits of color, and scale, and this was a small reflection of that.
